A parent's number of children strongly correlates with the number of children that each person in the next generation will eventually have. Factors generally associated with increased fertility include religiosity, intention to have children, and maternal support. Factors generally associated with decreased fertility include wealth, education ...

Contraceptive Use in the United States WHO NEEDS CONTRACEPTIVES? There are 61 million U.S. women of reproductive age (15–44). 1 About 43 million of them (70%) are at risk of unintended pregnancy—that is, they are sexually active and do not want to become pregnant, but could become pregnant if they and their partners fail to use a ...
